## FORGED CHEF'S KNIVES

### THE HANDLE

For the forged cook's knives only high grade POM plastic scales are used

### THE REFINEMENT

In eight steps the knife is smoothed to perfection. The honing by the hand of a master craftsman guarantees a perfect blade

### THE FORGING

From high grade chrome-molybdenum steel (X50 CRMO 14) the forged blank blade is manufactured in mine procedures

## Riveted Chef's Knives

### ERGONOMICS

The double-or triple- rivetted outer or solid material handle provides a safe grip when working in a professional kitchen

### POM

Polyoxymethylene is a dimensionally stable and rigid plastic that naturally meets the requirements of the Federal Food and Commodities Regulation

## Chocolate Melting Machine

- Multi-Purpose appliance for melting and keeping chocolate, fondant, toppings, sauces, jelly, etc.
- Non detachable stainless steel bowl
- Heat is uniformly distributed thanks to a special resistor
- Electronic regulation 25 to 90°C for a wide range of uses. Accuracy  $\pm 1,5^{\circ}\text{C}$
- Reduced energy consumption thanks to efficient insulation
- Weight: 1.8 kg

- Stainless Steel body and inner chamber
- warming tank has been designed specifically to heat and maintain chocolate at a temperature range of 20°C - 60°C / 68°F - 140°F
- Depending upon the required temperatures, it can potentially be used for similar materials such as icing, glaze, butter and the like
- warming tank provides a much faster, more accurate and more energy efficient solution for heating chocolate at a temperature range of 20°C - 60°C
- The system works with direct and air based induction heating, applied from below as well as each of the four sides
- This innovative heat distribution approach warms the chocolate much faster and more efficiently than the industry 'below only' induction heating plate standard - which take many hours longer to melt the chocolate
- Small, lightweight modern design with easy carry handles

## Pastry Equipments

**Pastry** : Macaroon, butter cream, custard, Chantilly cream, mousse, meringue, marshmallow, oating island, royal icing, etc.

**Cooking** : Mayonnaise, compound butter, pommes duchesse, mashed potatoes, ne stuf ng, etc.

- Easy to use with a traditional pastry bag
- Decorating tubes offer a myriad of combinations of colours and avours, to suit the inspiration of confectioners and cooks
- The system used ensures exceptional results in effect and colour shades
- The different types of tubes available (star, plain, Yule log tube, etc.) expand the possibilities to create original decorations

## PC Unbreakable Serving Tray

Unbreakable tray designed for catering use. Designed to meet the requirements of the catering and service industry. Allowing a multitude of possibilities for stacking that facilitates display and creativity. The decentralized lateral support, allows for varying depth height of the tray with a simple 180° flip. Allowing for a multi-layer display using multiple stacked trays. This overlapping arrangement maximizes internal space to accommodate finger food glasses of differing heights. This overlapping arrangement maximizes internal space to accommodate finger food glasses of differing heights. The sides allow storage in cupboards, and trolleys; as well as transport using the Thermobox thermal containers

## PC Unbreakable Buffet Display Trays

Unbreakable tray designed for catering use. Designed to meet the requirements of the catering and service industry. Allowing a multitude of possibilities for stacking that facilitates display and creativity. The decentralized lateral support, allows for varying depth height of the tray with a simple 180° flip. Allowing for a multi-layer display using multiple stacked trays. This overlapping arrangement maximizes internal space to accommodate finger food glasses of differing heights. This overlapping arrangement maximizes internal space to accommodate finger food glasses of differing heights. The sides allow storage in cupboards, and trolleys; as well as transport using the Thermobox thermal containers
